Born Nov. 11, 1864 on a farm on 76th avenue near Mokena he lived there all his life except the past 10 months when his health made it necessary to live with his daughter, Mrs. Arthur Bettenhausen in Tinley Park.

In March 1886 he was united in marriage with Miss Lizzie Kammert of Tinley Park. Since her death 25 years ago he has lived alone in the farm home.

He is survived by a son Edward and three daughters, Mrs. Sebastian Andres all of Tinley Park, and Mrs. Frank Schult of Chicago. 21 grandchildren and 19 great grandchildren.

Funeral services were held Sunday in the Zion Lutheran church in Tinley Park with Rev. Randolph F. Hahn officiating. Burial was made in the Burr Oak cemetery in Blue Island.

File Dram Shop Suit for \$30,000

Three tavernkeepers are being sued by Mrs. Martha Lee Doyle and her daughter Martha Jo, of Mokena, for \$30,000, for loss of support due to the death of their husband and father.

According to the complaint which has been prepared by the law firm of Wise and Wise, Joseph L. Doyle suffered fatal injuries in an automobile and truck accident after having been served intoxicating liquors in two Mokena taverns and one in Frankfort. The taverns involved in the suit are those operated by Mrs. Belle Robinson and Morris and Maude Larson, all of Mokena, and Charles P. Baumann of Frankfort.

It is alleged that following his visit to these taverns, Mr. Doyle failed to halt for a stop sign at routes 30 and 45 and crashed into a semi-trailer. He was killed in the crash.

The suit has been filed under the dram shop act.

MOKENA'S NEW BOARD MEETS; HITS SPEEDERS

The regular meeting of the Mokena village board was postponed until Thursday, May 7 because of the death of the father of John R. Scarth, newly elected board president. The new members of the board qualified before Tuesday night. Charles Burkhardt, in absentia, but were formally sworn in at the meeting. The Rock Island lines notified the board that they are considering substituting one train for numbers 283 and 285; the board will protest against the change.

The new board president announced his intention to crack down on speeders. He indicated that Will and Cook county authorities will cooperate with the Mokena police in arresting violators whose offenses originate within the village. Back street speeding will be classed as reckless driving because of the danger involved. Judge John Balaz will be instructed to hold court Friday nights in the village hall and a representative of the board will be present.

Mayor Scarth asked the streets and alleys committee to consider an over-all program for the improvement and repair of village streets, based on the amount of state fuel tax and local license funds which will be available. He also suggested that the finance committee chairmen, Lyman Teague, review past expenditures of the board to enable him to draw up a budget for the different departments.

Employees now working for the village will be retained for the present and the duties of each will be listed definitely. The board tabled two bills which had been questioned when presented to the previous board for collection, i. e. one for auditing the village books and one for repairs on the village hall. Willie A. Muehler petitioned the board for their approval for a 40 foot street to bisect his proposed subdivision. The matter was referred to the streets and alleys committee with a recommendation by Mr. Scarth, that the street be made 66 feet wide to correspond to the present practice by the other new subdivisions in the village and to county zoning board regulations.

Mayor Scarth referred the job of repairing and painting the water tank and super structure to controlling committee with the statement that he approved of having a report on the condition of the tank made by an engineer of the Chicago Bridge and Iron company, makers of the tank, at a cost of approximately \$100.

A new policy was inaugurated by the mayor in regard to any person petitioning the board on any subject whatsoever. He said that, in the future, residents of the village should contact the proper committee chairman for a hearing before appearing before the board. The problem would then be presented to the board by members of the committee. For the convenience of the village residents, the committee and chairman are listed here, the first named being chairman. It is suggested that this list be filed for future reference.

RECOVERS FROM EFFECTS OF AUTO ACCIDENT

Edward A. Brueser, of Mokena, who figured in a recent auto accident, has returned to his home in Woodland Circle where he is recuperating. The accident occurred April 28 as Mr. Brueser was returning from work about 5 o'clock. He was driving east on Lincoln highway about a mile east of New Lenox. Earl Wolfgang, also of Mokena, was driving behind Mr. Brueser, whom he had started to pass at a curve, when he noticed a truck approaching. He suddenly applied his brakes to get back into line behind the Brueser car. Wolfgang's car struck Brueser's car in the rear spinning it around, an dthrowing it into the path of the west-bound truck. The impact threw Mr. Brueser out of his car onto the highway, knocking him unconscious.

Another Mokena man, Mr. Everett Cooper, happened along at this time, stopped, recognized Mr. Brueser and took him in his car to the office of Dr. E. G. McMahon in Mokena, for emergency treatment. After making an examination, Dr. McMahon called an ambulance and Mr. Brueser was removed to Silver Cross hospital, where x-rays revealed injuries to the spine, skull and neck. He regained consciousness after three hours.

Driver of the truck was Joseph Stefanich, of Joliet. Deputy Sheriffs Steve Helis and Wayne

Are We Afraid of Peace?

By Thurman Sensing
Southern States Industrial Council, Nashville, Tenn.
We seem to be talking one way these days and acting another. We all say we want peace and yet our actions would indicate we fear its coming. "If Peace comes, can a Depression be far behind?" seems to be the theme of our attitude.

There have been varying opinions about the "cold war" of recent years, as well as about the "hot war" in Korea, which is the third worst foreign war in our history even though it has been characterized as "police action."

There have been those who thought previous administrations were not averse to the continuance of the cold war because it kept our factories busy and our production high.

There are those who thought these administrations made no effort to win the hot war because they had no plan for handling the depression which they felt sure would inevitably follow.

There have been those who thought that the Kremlin-led communist world promoted continuance of the cold war because they believed its requirements for defense spending on our part would destroy our economy.

There are those who think that any communist overtures for peace now are inspired by the fact that they realize the cold war is not producing the ends they desire, that the communists also believe peace would bring depression to the United States and that as a consequence our way of life would be destroyed.

There are economists and politicians and business leaders who predict good business so long as defense spending keeps up but who are most wary of the consequences should it be discontinued. There are labor leaders who have the peace jitters and want to obtain the best contracts possible before it comes; there are workingmen who believe peace would bring idle factories and great unemployment. The stock market goes up when war looks worse; it goes down when peace prospects grow brighter.

All sorts of people in all walks of life, but with one central, underlying idea—that war brings prosperity.

That's a strange philosophy that has taken hold of us. If it were true, then it should be our national policy to remain constantly at war—and the bigger the war the better, because the bigger the war the more prosperous we would be.

Why have we been caught up in such a ridiculous doctrine? There may be a number of subsidiary reasons but the main reason is undoubtedly the false notion that has been promulgated among us in recent years that

spending produces prosperity—no matter what the spending is for. We saw it tried in the "pump priming" days, we have seen it tried in lend-lease and foreign aid, in subsidies without end, and in many other ways. It has been preached to us so long and so vigorously by supposedly intelligent leaders that we have generally come to believe it.

Yet the doctrine is not so—and the sooner we realize it is not so, the better it will be for all of us. It is not so economically and it is not so morally. Spending for unproductive purposes simply brings on inflation, thereby often causing an illusion of prosperity, but the result is like treating a patient with narcotics rather than curative drugs. Also, those laboring under the delusion of war prosperity might ask the 133,000 casualties of the Korean War—those who can answer—and their families if they think we have had prosperity as a result of that war!

If we have reached such a low point in initiative and self reliance that we must depend upon war for prosperity, then we don't deserve prosperity. Any thinking person, of course, knows that we must not depend upon it; he knows that there are thousands of new things to be made and thousands of wants to be satisfied that will produce a sound economy in time of peace—and that a peacetime economy is the only sound economy.

She is on a furlough in this country. The vote of thank was given by Cheryl Sproat. A period of light refreshments and an opportunity to meet Miss Bowers followed the program. The receipts of the offering were presented to Miss Bowers to help with her work in India.

Preceding this program the Do Unto Others club had their regular weekly meeting at the church after school. A pot luck supper was served to them by their leaders, Mrs. Herschel Aseltine, Mrs. Francis Nelson and Mrs. Harwood Stellwagen assisted by some mothers. The Story of Men Who Build, Who Widen Civilization

Technology, if allowed to progress unhampered, can double the living standards of the average United States family within the next 30 years. This is pointed out in "The Builders" a new booklet published by the Du Pont Company.

The 32-page illustrated booklet is "the story of the men who build, whose labors have enlarged and widened our civilization." It provides a tribute to the men and women of DuPont's engineering department. This year is the 50th anniversary of the department's engineering service in the DuPont company.

Established in 1903, the Engineering Department is an integration of design, research and construction, unique in industrial history. During World War II this department built 58 military plants for the government. In the postwar years alone, Du Pont engineers, working 36 major projects, erected more than \$800,000,000 of new plant and equipment. New Du Pont plants rose in 12 states opening their gates to thousands of new employees.

Now, in addition to the company's commercial construction, the booklet points out, Du Pont engineers are designing and building for the U. S. government the \$1,300,000,000 Savannah River, South Carolina atomic materials plants, probably the largest single industrial construction job of all time.

The booklet documents that plant construction today is a complicated business. As science reaches further into uncharted fields, industry's requirements grow continually more complex its tools more elaborate. For example with today's transport earth-moving machinery, and powerful cranes, a crew of modest size could in less than two years duplicate the Great Pyramid, which took the Pharaohs Cheops' 100,000 slaves more than two decades of back breaking labor to build.

The booklet shows that today's spectacular new industrial technology is the key to plenty. "Its primary aim is simply to produce more goods at less cost, for progress comes only by increasing our total output. Mechanization as expressed in new tools and motor power multiplies each worker's labor many times. In the United States such 'horsepower' works out to 37 per capita, twice that of Britain and 33 times that of China or India."

Holstein Herd Averages 16 Qts. Daily For Year

With an average of 391 pounds of butterfat and 10,406 pounds of milk testing 3.8%, the 19 cow herd of registered Holstein-Friesians owned by John Y. Parker, Lockport completed their test year recently. Their production averaged approximately 16 quarts of milk daily for each cow in the herd for the year. Testing was carried on under the official Herd Improvement Registry program of The Holstein-Friesian Association of America.

Milking was done 2 times daily and testing was supervised by the University of Illinois, in cooperation with the national Holstein headquarters.

Buddy Poppies Help to Share In Freedom's Cause

On a day soon to come a stranger or a friend will walk up to you and say, "Won't you please buy a Buddy Poppy?" You are a good American.

You drop your donation in the box and accept your Buddy Poppy in return.

All over the United States each year the Veterans of Foreign Wars and members of the Ladies Auxiliary, sell Buddy Poppies. Every penny made on the Buddy Poppy sale is used to aid wounded and hospitalized veterans and their dependents.

Every one of the millions of tiny Buddy Poppies is a symbol of the men who fallen in battles. Let the names of those battles ring in your ears. San Juan, Chateau-Thierry, Anzio Beach, Iwo, and now—Heartbreak Ridge and Old Baldy. From 1898 to 1953—grandfathers fathers and sons have fought in these and all other battles of four American wars.

Founded a year after the Spanish-American War, the Veterans of Foreign Wars is dedicated to working for veterans and their families. The Buddy Poppy provides the opportunity for every citizen to share a little in the task to which this great organization is dedicated. Side by side with their men, the mothers, wives, sisters and daughters of the Veterans of Foreign Wars annually devote thousands of volunteer hours, and equal thousands of dollars to aid for veterans.

The Veterans of Foreign Wars National Home in Eaton Rapids, Mich., cares for the homeless wives and children of deceased and disabled veterans. Hospitalized veterans in 48 states, Alaska, Hawaii and the Canal Zone are the special concern of hundreds of local Auxiliaries. Each Auxiliary is assigned to volunteer tasks in nearby hospitals. Buy your Buddy Poppy with a prayer in your heart for those who have fought to keep our country free.

Petition Elections To Incorporate New Area Into A City

(CNS) Residents of Hometown petitioned the County court Wednesday, April 29, asking that an election be held on the proposition that the area be incorporated as a city.

The petition, signed by 153 residents, was filed by Edward T. Duray, attorney for the Hometown Owners Association comprised of the 5100 Hometowners.

The petition sets the borders of the proposed city as Crawford on the east, 87th on the north, 91st on the south and on the west Cicero from 87th to 90th and Kilpatrick (one block east of Cicero) from 90th to 91st. The site is 310 acres.

Attorney Duray said that after public meetings, the owners decided upon a mayor-city council type of government as most

suitable and most easily obtainable under the law.

Duray said that he will ask County Judge Edmund K. Jarrecki for an election date in June to decide whether a major-

ity of residents are in favor of the incorporation. The area is now unincorporated in Worth Twp. The area now includes 1200 homes with 400 planned or under construction.

Baseball season is in full swing in Alpine and Mr. Steve Turay has reason to say the game is not without hazard. In the bang up game played on Janulis ball field between the youngsters of 104 avenue, and Wolf road a week ago Sunday, Mr. Turay the Dad who umpired, received a cut over one eye, had a fence fall on him and was so stiff and sore he couldn't go to work the next day. Pardon Our Popping Buttons...

WE'VE really got something to shout about!

Never before have any 2- and 3-plow tractors packed so many features, offered so much more value, or been so downright easy to handle as these great new John Deere "50's" and "60's."

New Duplex Carburetion engines provide more "get-up-and-go" . . . smoother, quieter performance. Independent "live" power shaft and "live" hydraulic system save up to 40% of the shifting and clutching formerly required. Rear wheels are respaced in a jiffy. Steering is easier than ever. All these and many other new features step up performance to a point where operating these tractors is an entirely new experience.

And so—if a few buttons pop—pardon it, please. It's all because these husky, all-new tractors have every feature you and other farmers like you have been wanting. Come in and let us show you.
